

Yury Takzhanov

Senior Java Backend Engineer

Yerevan, Armenia | Open to EU relocation, priority France/Germany

takzhanov@gmail.com | linkedin.com/in/takzhanov | t.me/takzhanov | takzhanov.github.io/me

Summary

Senior Java Backend Engineer with 15+ years of commercial experience in telecom, streaming media, and retail systems. Strong in backend engineering, legacy modernization, SQL performance, integrations, and production reliability. I currently work on a legacy Java monolith inside a large-scale distributed streaming product environment, owning backend areas for user subscriptions, purchases, and integrations.

Core Skills

- Backend: Java 8–21, Spring, REST, SOAP, gRPC
- Systems: distributed deployments, integrations, authorization, API gateways, legacy modernization
- Data: PostgreSQL, Oracle, SQL tuning, JPA/Hibernate, Liquibase
- Delivery: GitLab CI/CD, Docker, Docker Swarm, Linux, Nginx
- Observability: Prometheus, Grafana, Micrometer

Experience

Senior Java Developer / Team Lead

Restream Media (Wink)

2016 – Present

Moscow, Russia

- Owned backend areas for user subscriptions, purchases, and integrations in Wink, a streaming product with around 10M monthly users.
- Evolved a legacy Java monolith deployed across macro-regions, processing around 300 RPS and storing around 2 TB of data per macro-region.
- Designed and delivered new purchase and subscription methods, evolved integration mechanics, and separated B2B functionality into a dedicated subproject.
- Designed and built authorization and API gateway services supporting the core product.
- Drove platform modernization from Java 6 to Java 21 and introduced Spring incrementally into the legacy codebase.
- Improved release reliability and accelerated incident investigation through clearer logging, stronger reviews, and safer changes to legacy modules.
- Provided technical direction for a five-engineer team through architecture decisions, task decomposition, and code reviews.
- Simplified onboarding for new engineers; interviewed around 20 candidates and hired 5 engineers.

Senior Java Developer

AT Consulting

2013 – 2016

Moscow, Russia

- Built discount engine logic for retail products and implemented service APIs.
- Built KPI calculation services for telecom systems.
- Developed knowledge management functionality for contact center operations.

Developer Experience

Icicall / Intellectika / AuditNT

2008 – 2013

Moscow, Russia

Education

Specialist Degree (5-year program) in Applied Mathematics and Computer Science
Southern Federal University (former Rostov State University), 2003 – 2008

Languages

English (working proficiency), Russian (native), French (elementary)
